EDUCATION

2015 - 2019

PRINCESS SUMAYA UNIVERSITY FOR TECHNOLOGY

- B.SC. Degree in Computer Science

Technical Skills

- Frontend: React (Vite / Next.js), React Native, HTML, CSS, Tailwind CSS
- Programming & Tools: JavaScript, TypeScript, Node.js
- Design & UX: UI/UX Principles, Responsive Design, Component-driven Architecture

ABOUT ME

I am a Web Developer with over 4 years of commercial experience, specializing in building modern, responsive, and high-performance web applications. I thrive at the intersection of creativity and functionality, transforming UI/UX designs into seamless digital experiences using React, Next.js, Node.js, and modern frontend and backend technologies, including building APIs, server-side functionality, and automation tools.

I excel at crafting cross-browser, semantic layouts with a focus on maintainable and scalable code, while also developing backend solutions that power complex applications and integrations. Beyond coding, I enjoy solving complex problems, optimizing application performance, and creating tools that simplify workflows such as Telegram bots and mini-applications that automate routine processes and enhance user interaction.

I am eager to contribute to a forward-thinking team where I can continue advancing in frontend and backend architecture, performance optimization, and engineering excellence while delivering impactful, full-stack digital experiences.

WORK EXPERIENCE

LeadHunters   Jan 2022 – Present

Middle Web Programmer

A media buying agency specializing in traffic acquisition across various social media platforms.

➤ Main Responsibilities:
- Developing services and mini-applications integrated with Telegram bots and Telegram mini apps
- Building and adapting landing pages/pre-landing pages for different devices
- Developing and integrating APIs
- Maintaining and improving website forms
- Identifying and fixing bugs, optimizing client-side code
- Localizing interfaces for different languages

➤ Key Achievements:
- Developed and implemented various services and mini-applications in Telegram
- Built a Telegram bot in Node.js to automate routine processes, significantly speeding up and simplifying daily workflows
- Created and adapted layouts for multiple devices, ensuring full cross-browser compatibility
- Developed and integrated APIs to ensure stable web application performance
- Fixed defects and technical issues, improving overall user experience
- Enhanced form functionality by adding interactive elements and creating an anti-duplicate script
- Optimized web application performance
- Adapted landing pages and pre-landing pages for Arabic-speaking users
- Built a Playwright project for user-agent emulation

CERTIFICATIONS

Aug/2023

META FRONT-END DEVELOPER PROFESSIONAL CERTIFICATE

Feb/2024

META REACT NATIVE SPECIALIZATION

Feb/2024

AGILE WITH ATLASSIAN JIRA

Sep/2024

IBM FULL STACK SOFTWARE DEVELOPER PROFESSIONAL CERTIFICATE

Dec/2025

THE COMPLETE AL CODING COURSE (2025) - CURSOR, CLAUDE CODE

- Developed a bot using Puppeteer and Node.js for automated form filling and data submission
- Created a web application for generating random user data with country and quantity filters

➤ Pet Projects (built alongside full-time work):
1. Social Media Platform - React, TypeScript, Appwrite, shadcn/ui, Tailwind CSS, React Query
- https://diagram-pi.vercel.app/
2. E-commerce Store - React, Next.js, Stripe, Sanity CMS
- https://ecommerce-app-ivory-two.vercel.app/
3. Admin Dashboard - React, Syncfusion, Tailwind CSS
- https://trendyboard.vercel.app/

Additional projects available on GitHub: github.com/AymanAbusura

➤ Key Performance Indicator (KPI):
- Reviewed and implemented over 35,000 landing and pre-landing pages within 4 years.

Tech Stack: HTML5, CSS3, JavaScript, React, Node.js, PHP

Nozzum for Business Solutions   Mar 2020 - Jun 2021

Java Developer

Specializing in software solutions for businesses, particularly in the financial sector. Developed "Remit Flow", a platform for currency exchange and money transfers.

➤ Main Responsibilities:
- Participated in all stages of software development: design, implementation, deployment, and support.
- Developed and maintained Java/Java EE applications with a focus on performance and scalability.
- Collaborated with cross-functional teams (analytics, DevOps, support) to ensure smooth operations.
- Prepared technical documentation and user guidance.

➤ Key Achievements:
- Built sender data input module (validation, document processing).
- Integrated with MySQL for customer data storage and optimized queries.
- Calculated commissions, taxes, and final amounts dynamically.
- Integrated external APIs for transfers and currency transactions.
- Implemented business logic for currency conversion and final amount calculations.

TECH STACK: Java, Spring (Boot, Security), Hibernate, MySQL, RESTful APIs

Shahin Computer Est.   Jul 2018 - Jul 2019

Technical support specialist

An IT services company specializing in domain registration, hosting, web design and development, as well as offering accounting systems and technical support.

➤ Main Responsibilities:
- Troubleshooting and resolving software and hardware issues.
- Diagnosing and fixing technical problems, including account setup and network configuration.
- Following up with clients to ensure full functionality of their IT systems after issue resolution.
